

Volume 12, Number 5  
October 2019  
ISSN: 1983-4195

### Contents

<b><i>Nonlinear numerical analysis of composite slabs with steel decking</i></b> A. R. SILVA and P. B. SILVA	972
<b><i>Nonlinear static analysis of a pile-supported wharf</i></b> E. ZACCHEI, P. H. C. LYRA and F. R. STUCCHI	998
<b><i>Experimental study of reinforced masonry beams</i></b> J. S. CAMACHO, L. F. CONTADINI and G. A. PARSEKIAN	1010
<b><i>Floors number influence on the instability parameter of reinforced concrete frame-braced buildings</i></b> R. J. ELLWANGER	1034
<b><i>Structural models for analysis of reinforced concrete frame buildings with masonry infills</i></b> G. M. S. ALVA and G. A. MONTANDON	1058
<b><i>Reliability of reinforced concrete beams designed in accordance with Brazilian code NBR-6118:2014</i></b> M. SCHERER, I. B. MORSCH and M. V. REAL	1086
<b><i>Study of the influence of compressive strength concrete on columns during the design of a multi-floor building</i></b> G. M. FREGONEZI, W. W. WUTZOW and R. D. VANDERLEI	1126
<b><i>Assessment of concrete anisotropy by means of compression and indirect tensile tests</i></b> L. E. KOSTESKI, E. MARANGON and J. D. RIERA	1148
<b><i>Experimental evaluation on the structural behavior of truss shear connectors in composite steel-concrete beams</i></b> W. C. S. BARBOSA, L. M. BEZERRA, L. CHATER and O. R. O. CAVALCANTE	1157
<b><i>About the use of semi-continuity in simply supported composite steel and concrete beams, to remove fireproof coatings for standard-fire resistance requirement of less than 30 minutes</i></b> L. C. ROMAGNOLI and V. P. SILVA	1183
<b><i>Contribution to hierarchical modeling in tunnel design practice</i></b> B. S. DZIALOSZYNSKI and F. R. STUCCHI	1205
<b><i>Comparative analysis of normative provisions for seismic design and detailing of reinforced concrete structures</i></b> R. A. RODRIGUES, C. E. N. MAZZILLI and T. N. BITTENCOURT	1220
