### Contents

- Proposal of a simplified criterion to estimate second order global effects in reinforced concrete buildings***  
R. N. CUNHA, L. A. MENDES and D. L. N. F. AMORIM  
200
- Influence of concrete admixture on the bond strength of reinforced concrete submitted to high temperature***  
V. A. JERÔNIMO, A. C. PICCININI, B. V. SILVA, D. S. S. GODINHO, A. M. BERNARDIN and A. VARGAS  
212
- Factors influencing ultrasonic pulse velocity in concrete***  
J. P. GODINHO, T. F. DE SOUZA JUNIOR, M. H. F. MEDEIROS and M. S. A SILVA  
222
- Analysis of soil-structure interaction in buildings with deep foundation***  
M. G. RITTER, M. L. MENEGOTTO, M. F. COSTELLA, R. C. PAVAN and S. E. PILZ  
248
- Evaluation of the GPR (1.2 GHz) technique in the characterization of masonry shells of the Theatro Municipal do Rio de Janeiro***  
D. C. B. CINTRA, P. M. B. MANHÃES, F. M. C. P. FERNANDES, D. M. ROEHL, J. T. ARARUNA JÚNIOR and E. S. SÁNCHEZ FILHO  
274
- Concrete crack repair analysis with metakaolin-based geopolymer cement***  
B. J. FRASSON, F. PELISSERAND and B. V. SILVA  
298
- Experimental study on precast beam-column connections with continuity reinforcement for negative bending moments***  
G. M. S. ALVA, M. M. S. LACERDA and T. J. SILVA  
314
- Numerical model of beam-to-column composite connection between slim floor system and composite column***  
R. F. F. KOICHEM and S. DE NARDIN  
348
- Reliability analysis of a prestressed bridge beam designed in serviceability limit state as recommended by NBR 6118 and 7188***  
P. H. C. DE LYRA, A. T. BECK and F. R. STUCCHI  
380
- Fire behavior of shallow prestressed hollow core slabs from computational modeling***  
D. L. ARAÚJO and G. D. C. PINTO  
398
- Lightweight concrete with coarse aggregate from ceramic waste at high temperatures***  
L. PASSOS, A. L. MORENO JR. and A. A. A. SOUZA  
433
- Effect of carbon nanotubes sonication on mechanical properties of cement pastes***  
J. E. L. DE SIQUEIRA and P. J. P. GLEIZE  
455
